## Point Group Character Tables

Appendix A contains Point Group Character (Tables A.1–A.34) to be used throughout the chapters of this book. Pedagogic material to assist the reader in the use of these character tables can be found in Chap. 3. The Schoenflies symmetry (Sect. 3.9) and Hermann–Mauguin notations (Sect. 3.10) for the point groups are also discussed in Chap. 3.

Some of the more novel listings in this appendix are the groups with five-fold symmetry  $C_5$ ,  $C_{5h}$ ,  $C_{5v}$ ,  $D_5$ ,  $D_{5d}$ ,  $D_{5h}$ ,  $I$ ,  $I_h$ . The cubic point group  $O_h$  in Table A.31 lists basis functions for all the irreducible representations of  $O_h$  and uses the standard solid state physics notation for the irreducible representations.
